OVERVIEW

True Digital Park promotes socially and environmentally responsible business practices and aims to encourage carbon-neutral events through the TDPK Carbon Neutral Events Service. This service will help lead the Global Net-Zero Emissions mission by 2050.

In collaboration with Vekin (Thailand) Co., Ltd., a specialist in environmental energy management and greenhouse gas management systems, True Digital Park now offers Thailand's first Carbon Neutral Events Service. This platform enables event organizers to calculate and offset carbon emissions, ensuring their events contribute to carbon neutrality and setting a new standard for sustainable event management in the region.

WHY ARE WE DIFFERENT?

Green Event Space

Our innovative space provides eco-friendly facilities designed to reduce carbon footprint. We've also installed tools to measure energy usage in event spaces and accurately calculate the carbon footprint.

Enhance Your Event with Sustainability

We provide guidance on TCEB's guidelines and help you obtain the "Sustainable Event" logo. Complete a pre-survey on our platform to calculate the carbon footprint and receive the TGO-certified "Carbon Neutral" logo for event promotion.

Carbon Assessment Platform

We have a platform for carbon assessment and offsetting, along with the Smart Dashboard tool. We will provide emissions reports and support for certification submission as a Carbon Neutral Event from "Thailand Greenhouse Gas Management Organization (TGO)".

6 STEPS TO CARBON OFFSET

1

Pre-survey

Measure your emissions.

2

Carbon Assessment

Calculate emissions and purchase carbon credits.

3

Checklist

Follow 25 guidelines for a Sustainable Event.

4

Promote Your Event

Announce your event as a responsible carbon offsetter.

5

Smart Dashboard

Track and verify data, then offset carbon.

6

Certification Submission

Get certified by Thailand Greenhouse Gas Management Organization (TGO)
